The 3 categories of an assault weapon in CA

- Category 1- are firearms listed on the original Robert i-Roos assault weapons list PC section 30510(c).
- Category 2- was the legally ambiguous definition targeting AR and AK "series" firearms in PC 30620(c). This definition was modified by the California Supreme Court in 2001 in what is known as the Harrott V. County of Kings (2001) 25
- Cal.4th 1138. The DOJ was required to create an additional list of firearms by make and model. It is available in CCR 11 § 5499 and is sometimes referred to as the "series list". Then came AB2728, which prevents the DOJ from ever updating the list after Jan 2007.
- Category 3- are defined by characteristic features listed in PC 30515(a). These are sometimes referred to as "SB23 features" (Senate Bill 23).

The 3 categories of an assault weapon in CA

30515(a) Notwithstanding PC section 30510, assault weapon shall also mean the following: Rifles

1. A semiautomatic, centerfire rifle that has the capacity to accept a detachable magazine CCR 11 § 5469 (a) and any one of the following:
 - A pistol grip CCR 11 § 5469 (d)
 - A thumbhole stock. CCR 11 § 5469 (e)
 - A folding or telescoping stock.
 - A grenade launcher or flare launcher.
 - A flash suppressor. CCR 11 § 5469 (b)
 - A forward pistol grip. CCR 11 § 5469 (c)
2. A semiautomatic, centerfire rifle that has a fixed magazine with the capacity to accept more than 10 rounds.
3. A semiautomatic, centerfire rifle that has an overall length of less than 30 inches.

Definition of a "Detachable Magazine" CCR 11 § 5469 (a)

"Detachable magazine" means any ammunition feeding device that can be removed readily from the firearm with neither disassembly of the firearm action nor use of a tool being required. A bullet or ammunition cartridge is considered a tool.

Definition of a "Thumbhole Stock" CCR 11 § 5469 (e) CCR 11 § 5469 (a)

"Thumbhole stock" means a stock with a hole that allows the thumb of the trigger hand to penetrate into or through the stock while firing.

Definition of a "Flash Suppressor" CCR 11 § 5469 (b)

"flash suppressor" means any device designed, intended, or that functions to perceptibly reduce or redirect muzzle flash from the shooter's field of vision. CCR 11 § 5469 (b)

Flash Suppressor/Flash Hider: is a device attached to or integral with the muzzle of a firearm, designed to eliminate or reduce the incandescent flash of the firearm's discharge. Although they can reduce the visibility of the firearm's location when fired, they are primarily designed to prevent the shooter's vision from being blinded by the flash at night. Many flash hiders also act as a muzzle brake.

Characteristics of a flash suppressor: The majority of these devices come in two styles. The multi prong and the birdcage flash suppressor. The inner cavity of the muzzle device is usually several times the diameter of the bore. The muzzle device usually has large slots to allow the propelling gasses to blow through: redirecting, reducing, eliminating the muzzle flash from the shooter's field of vision.

Muzzle Brake/Muzzle Compensator: is a device attached to or integral with the muzzle of a firearm, designed to redirect the propelling gasses to counter the firearm's: recoil, muzzle rise.

Characteristics of muzzle brake: The major difference between a flash suppressor and a muzzle brake is the size of the inner cavity. The inner cavity of a muzzle brake is usually just slightly larger than the diameter of the bore. This better traps the propelling gasses behind the bullet. This forces/redirects more of the gasses to escape through small ports/slots in the muzzle device. These ports/slots are usually machined/drilled in strategic locations or angled to divert the gasses to reduce the firearms: recoil, muzzle rise.

Definition of a "Pistol Grip" PC 30515(a) & CCR 11 § 5469 (d)

"pistol grip that protrudes conspicuously beneath the action of the weapon" means a grip that allows for a pistol style grasp in which the web of the trigger hand (between the thumb and index finger) can be placed below the top of the exposed portion of the trigger while firing.
